7 November 1951

CENTRAL INTELLIGENCE AGENCY

OFFICE OF NATIONAL ESTIMATES

SUBJECT: TERMS OF REFERENCE: NIE- : RELATIVE STRATEGIC IMPORTANCE OF BAST-WEST TRADE TO THE SOVIET ORBIT AND TO THE REST OF THE WORLD

THE PROBLEM

To measure the contribution of Mast-West trade to the relative economic capabilities for war of the Soviet Orbit and the rest of the world, by estimating quantitatively the economic damage suffered by the Orbit and the non-Orbit area, assuming reductions in or an embarge on this trade.

QUESTIONS BRARING ON THE PROBLEM

- I. UNDER WHAT CIRCUMSTANCES HAVE TRADE RESTRICTIONS BEEN APPLIED IN THE PAST?
 - A. In World War I?
 - B. In the Italian campaign against Ethiopia?
 - C. In the "China Incident?"
 - D. In World War II?
 - I. In the Berlin blockade and counter-blockade?

L' East-West trade is herein defined as trade between the Soviet Orbit (including China) and the rest of the world.

- II. WHAT WOULD BE THE PROBABLE PATTERS OF BAST-WEST TRADE IN 1952

 IF EXISTING RESTRICTIONS WERE CONTINUED?
 - A. What have been the developments in the pattern of trade mince 1948?
 - B. What are present restrictions?
 - C. What is the current pattern of trade?
 - 1. Overt trade?
 - 2. Clandestine trade (in so far as it can be estimated)?
 - D. What changes in the pattern of trade are likely in 1952 on the basis of present trade agreements and negotiations?
 - E. What pattern of trade would result in 1952?
- III. WHAT WILL BE THE STRATECHIC EFFECT ON THE SOVIET ORBIT OF REDUCTIONS
 IN OR AN EMBARBO ON EAST-WEST TRADE?
 - A. Assuming a complete embargo on the non-Orbit exports to the Orbit estimated in paragraph II. E.:
 - 1. What commodities will the Orbit lose, and in that quantities?
 - 2. What damage will the Orbit suffer?

(Take each import separately.)

- a. What are the current availabilities of this item?
- b. To what extent can lost imports be replaced?
 - (1) What measures can be taken to replace the lost imports:
 - a) Increased domestic production? b) Substitution?
 - c) Use of stockpiles?
 - (2) What will be the cost (in materials, manpower, etc.)
 to the Orbit of replacing these quantities of the lost

Approved For Release 2001/03/02 : CIA:RITE75-00662R000200150047-6

- of the unreplaced imports, and in what manner?
- 3. What offsetting values will accrue to the Orbit from decreased trade? Availability of goods fermerly exported by the Orbit?

 Resources released through loss of production in the industries which used the imports?
- What willbe the net strategic effect on the economy of the Orbit, both short-run and long-run? The effect on capabilities for a short war? A long war?
- B. Assuming selective embargoes on the non-Orbit exports estimated in paragraph II. B. answer questions III. A. 1. through 4.
- IV. WHAT WILL BE THE ECONOMIC EFFECT ON NON-ORBIT COUNTRIES OF REDUCTIONS
 IN OR AN EMBARGO ON HAST-WEST TRADE?
 - A. Assuming a complete embarge on the Orbit exports to non-Orbit countries estimated in Paragraph II. E.:
 - What commodities will the non-Offit countries lose, and in what quantities?
 - 2. What damage will the West suffer?
 (Take each import separately.)
 - A. To what extent can these lost imports be replaced by reallocation of resources and new patterns of trade within the non-Orbit area? How can this be done and at what cost (in terms of resources diverted, or in money expenditures)?

- b. What payments difficulties will arise as a result of shifting production and trade patterns, and to what extent can they be overcome?
- c. To the extent that these lost imports cannot be replaced, what damage will non-Orbit countries suffer?
- 3. What willbe the offsetting values obtained from using the resources which are presently going into the production of exports to the Orbit?
 - produce the items presently exported to the Orbit, what values will be obtained from selling those items in non-Orbit markets (including the domestic market)?
 - b. To the extent that these resources are used for the production of other goods, what values will be obtained?
- 4. What will be the net economic effect on the non-Orbit area?
- B. Assuming selective embargoes on the Orbit exports to non-Orbit countries estimated in paragraph II. E., answer questions IV. A. 1. through 4.
- V. WHICH SIDE WOULD SUFFER GRUATER STRETFGIC DAMAGE FROM A REDUCTION IN OR COMPLETE SEVERANCE OF EAST-MEST TRADE?
 - A. From complete severance?
 - B. From selective embargoes, assuming comparable action by the Soviets to reduce executs to the West?
